EDUCATION

University of Maryland College Park

Bachelor of Science in Computer Engineering; GPA 3.75

Honors/Awards: "University-Honors" Honors College, Shewell Keim Scholarship in Computer Engineering

Relevant Coursework: Object Orientated Programming, Data Structures & Algorithms, Calculus I/II

College Park, Maryland

Expected May 2027

TECHNICAL SKILLS

Programming Languages: Java, Python, HTML, CSS, JavaScript, Node.js, Arduino

Programs/OS: VScode, Eclipse, PyCharm, Arduino IDE, Git, AutoCAD, Microsoft Office, Mac OS, Window's OS

TECHNICAL EXPERIENCE

Incoming JPMorganChase (Code for Good)

Jersey City, New Jersey

September 2024

Amazon x CodePath

Arlington, Virginia

Software Engineering Apprentice

May 2024-August 2024

- Engaged in collaborative coding projects, applying data structures and algorithms to real-world scenarios and practical problems, enhancing ability to work effectively in a group setting
- Prepared for professional career through immersive workshops, tech-related speaker engagements/projects, and direct mentorship from Amazon employees
- Attended technical events at Amazon HQ2

Capital One

July 2024-August 2024

Software Engineering Summit

- Participated in Capital One's Black & Hispanic Tech Summit, engaging in advanced tech workshops, and a competitive hackathon, while expanding my professional network and enhancing my problem-solving skills.

PROJECTS

Project: PeterGotKicks | HTML/CSS, JavaScript, Node.js, Express.js, RestAPI | [GitHub](#) | [PeterGotKicks.com](https://petergotkicks.com)

Founder & Developer

April 2024-May 2024

- Developed a dynamic sneaker database website, resulting in a user-friendly platform that allows visitors to view detailed information about various sneaker models, by leveraging Express.js and Node.js for server-side routing and handling HTTP requests and HTML/CSS and JavaScript for the User Interface.
- Implemented a product pricing feature using RestAPI's, providing real-time price comparisons from different Resell Marketplaces including StockX, Goat, and FlightClub, enhancing the user's decision-making process, saving users over \$100 per some models.
- Enhanced website performance by utilizing Express.js leading to faster load times & improved website functionality

Project: FinanceFocus (Capital One BHTS Hackathon) | HTML/CSS, JavaScript | [GitHub](#)

August 2024

- Developed Finance Focus, a platform enhancing financial literacy with personalized advice for various life stages, using HTML, CSS, and JavaScript.
- Created a user-friendly website offering tailored financial education to help users build credit, invest, and make informed decisions on many other topics.

Project: Hospital Management System | Java, Java Swing | [GitHub](#)

February 2024

- Designed and implemented a Hospital Management System using Java Swing for the graphical user interface and Java for the backend, showcasing skills in backend engineering.
- Developed a user-friendly interface for hospital staff to manage patient and doctor information, schedule appointments, and track medications.

Project: OTV Development | C++, Arduino, AutoCAD | [Presentation](#)

September 2023-December 2023

- Planned, constructed, and developed a specialized Automated Guided Vehicle (AGV) for water sampling tasks.
- Orchestrated AGV navigation to autonomously collect a 20ML water sample, utilizing Ultrasonic Sensor for depth measurement, DIY salinity sensor for water assessment, and integrated Arduino Color Sensor for pollution detection.
- Led Arduino (C++) coding and debugging, ensuring communication between software & hardware.

LEADERSHIP

Freshman Executive Board Treasurer

College Park, Maryland

UMD Black Student Union

September 2023-May 2024

- Managed the financial affairs of UMD's Black Student Union, overseeing budgeting, fund allocation, and fundraising
