EDUCATION

University of Maryland, College Park

Bachelor of Science in Computer Science; GPA: 3.5

College Park, Maryland

Expected May 2027

- **Honors/Awards:** University Honors College, Shewell Keim Scholarship in Computer Science
- **Relevant Coursework:** Object Oriented Programming, Data Structures & Algorithms, Computer Systems, Computer & Network Security, Data Science, Artificial Intelligence, Linear Algebra, Calculus I/II, Applied Probability & Statistics

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, TypeScript, HTML/CSS, OCaml, Rust, React.js, Node.js, Express.js

Programs/Tools: Git, Linux, Docker, Spring Boot, Claude Code, Cursor, AWS Lambda, AWS CDK, CI/CD, NoSQL, SQL

TECHNICAL EXPERIENCE

Amazon

Software Development Engineering Intern — Box Optimization Team

Bellevue, Washington

June 2026 – Present

- Developing **scalable software solutions** that power Amazon's Box team, optimizing **packaging efficiency** and reducing environmental impact across global fulfillment operations impacting millions worldwide.
- Built an **AI-powered audit history system** for Amazon's ALIAS packaging service using **DynamoDB Streams, AWS Lambda, and DynamoDB**, capturing changes across a system processing **34M+ annotation updates every six weeks**.
- Reduced incident investigation from manual log and DynamoDB searches to **seconds** by giving on-call engineers searchable change history, bulk-upload impact, and **AI-assisted root-cause analysis**, addressing investigations that previously cost **\$6.2K in engineering time**.

Safo Sports Group

Founding Engineer

College Park, Maryland

June 2025 – Present

- Co-founded an **AI-powered NIL platform** connecting college athletes with brands; built the **React/TypeScript frontend**, Spring Boot backend, matching service, secure auth, and real-time profile management.
- Built **AWS infrastructure-as-code** on ECS Fargate, RDS, Redis, ALB, and S3 with multi-AZ redundancy and horizontal auto-scaling, enabling reliable production-ready **CI/CD deployments**.

Amazon

Software Development Engineering Intern — Box Optimization Team

Bellevue, Washington

May 2025 – August 2025

- Engineered a **cloud-native service** using AWS Lambda, SNS/SQS, and DynamoDB to replace a server-based Box Recommendation troubleshooting tool, cutting latency by **35%** and saving **\$100,000+/yr** in storage and server costs.
- Automated infrastructure deployment with **AWS CDK** and implemented error-handling monitors and alarms, improving system reliability and reducing manual maintenance overhead.

PROJECTS

NextDoorLearn | *React.js, Node.js, Tailwind CSS, SQLite*

October 2025 – Present

- Built a **full-stack tutoring platform** connecting underserved students with volunteer tutors, implementing role-based authentication, tutor discovery, connection workflows, and secure messaging using React, Node.js, and SQLite.

MyFGI | *React.js, CSS, SQLite | JP Morgan CFG Hackathon*

September 2024

- Led frontend development of a **financial literacy hub** for Non-Profit First Generation Investors building authentication and core user workflows with React, React Router, Axios, and SQLite during JPMorgan Code for Good.

PeterGotKicks | *HTML/CSS, JavaScript, Node.js, Express.js, REST API*

April 2024 – May 2024

- Built a sneaker database with Express.js and Node.js featuring real-time price comparisons from StockX, GOAT, and FlightClub via REST APIs, saving users over **\$100** on select models.

LEADERSHIP

Code: Black UMD

President

College Park, Maryland

June 2024 – Present

- Lead a **300+ member Computer Science organization** focused on creating opportunities for minorities in tech through professional development events, community programming, and diversity-centered technology initiatives.
- Created a hands-on professional development program connecting students with engineers from **Google, AWS, Bloomberg, and other leading technology companies** through technical workshops, career panels, and industry mentorship.
